

Uniform Registration of **Inland Barges (UAB) Online.**

Vopak uses UAB Online for the communication with the inland barges loading and unloading at all Vopak's terminals in the Netherlands. By using UAB Online, Vopak will have one uniform system for registration with permanent details per barge and per Vopak location. The benefits of a uniform registration system are the reduction in the number of registrations by telephone (less phone traffic), clear registration details, improved registration of the entire administrative process, and the fact that carriers and barge captains can be optimally informed. UAB Online is also available on smartphone and tablet for Vopak's carriers.

How does it work?

You only need to create an account on <http://www.uab-online.eu/> once. Here you fill in the master data for your barge and the permanent registration details. You can then complete the preregistration online via the registration form which appears on your screen. Your permanent details are already filled in for you. You only need to answer the specific questions on the form and press the button "Send". You do not need to buy any separate software and the use of this internet application is free of charge for you. Depending on the Vopak terminal, a few hours before you arrive at the terminal you send the expected arrival time and registration form via your pc, laptop, tablet or smartphone. You will directly receive a notification whether the registration has been received and approved and which service will be initiated.

Questions?

Should you have any questions or comments, please contact the Planning desk at Vopak Terminal Vlaardingen by sending an e-mail to:
